

Course Overview:

This 130-minute course lays the foundation to ensure an effective job search from the start. Learn the most effective job search methods to ensure you land as quickly as possible, best practices for managing your job search, how to ensure a winning brand and set weekly job search goals to keep you on track. During this course we take a deep dive on the topic of networking showing you why it is an important job search strategy and how to effectively request and run a networking meeting. Learn about other methods of search including targeting employers of interest, how to find advertised job openings, how to increase your visibility online and tips for working with staffing and employment organizations. Get focused, get smart and learn the best strategies to reduce your time in search!
